

StormGeo

Severe Weather Alert Status Update

For: {Cox Operating LLC} SM-217 SS-169

Condition Orange

Severe Thunderstorms

Issued: 2:53 PM CDT Tue, Apr 13, 2021.

Valid: 04:00 PM CDT Tue to 08:00 PM CDT Tue

Lightning	Frequent
Hail	Up to 1 1/2 inches in diameter
Tornadoes	Isolated
Wind	Gusts to 80 kts

Discussion:

A cluster of strong to severe thunderstorms over southern Louisiana will begin to move offshore within the next 1-2 hours. As these storms move southward, they will produce northerly wind gusts as high as 70-80 knots, large hail, and frequent lightning, as well as torrential downpours.

Meteorologist: A. Lyles

Call us toll-free at 1-877-792-3225 if you have any questions about this weather alert.

StormGeo's **Phased Alert System** are qualified with a color condition status. The condition color will vary according to the **severity** and **immediacy of the threat**, and the **confidence that the forecaster has that the severe weather will directly affect a given area**.
